2 Ratings

Ratings

The Instruments are expected to be rated on or about the Issue Date by DBRS Ratings Limited (“**DBRS**”). The rating of the Instruments on or about the Issue Date will be published on the website of the Luxembourg Stock Exchange (www.bourse.lu) and on the website www.it.investmentprodukte.db.com on or about the Issue Date. No assurance is given that the Instruments will have a particular rating, or any rating at all, on or about the Issue Date.

The DBRS long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligations has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category.

AAA

Highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

AA

Superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from AAA only to a small degree. Unlikely to be significantly vulnerable to future events.

A

Good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than AA. May be vulnerable to future events, but qualifying negative factors are considered manageable.

BBB

Adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be

vulnerable to future events.

BB

Speculative, non investment-grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

B

Highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

CCC / CC / C

Very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although CC and C ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the CCC to B range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the C category.

D

A financial obligation has not been met or it is clear that a financial obligation will not be met in the near future or a debt instrument has been subject to a distressed exchange. A downgrade to D may not immediately follow an insolvency or restructuring filing as grace periods or extenuating circumstances may exist.

DBRS is established in the European Union and registered under Regulation (EC) No 1060/2009.

The CSSF has provided the Commissione Nazionale per le Società e la Borsa, the competent authority in the Republic of Italy and l'Autorité des services et marchés financiers, the competent authority of the Kingdom of Belgium with a certificate of approval attesting that the Base Prospectus has been drawn up in accordance with the Prospectus Directive.

Section D – Risks

Element	Description of Element	Disclosure requirement
D.2	Key risks specific to the Issuer	Factors which could materially adversely affect the Company and its ability to make payments due under the Series of Instruments include matters of Luxembourg law (such as the Company being structured to be insolvency-remote, not insolvency-proof, changes to the Issuer's tax position adversely affecting cash flows in connection with the Instruments, and the provisions of the Securitisation Act 2004 providing that Series Assets of a Compartment are only available for the Series Parties of the Series relating to that Compartment), the Instruments being limited recourse obligations (meaning that an Instrumentholder's claim may be extinguished if there is a shortfall in funds available to meet payments under the Instruments) and related risks and further issues of Instruments by the Issuer.
D.3	Key risks specific to the securities	There are also certain factors which are material for the purpose of assessing the risks associated with the Series of Instruments. These include the fact that such Instruments may not be a suitable investment for all investors (for example if they do not have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Issuer in context of their financial position or are not capable of bearing the economic risk of an investment in the Issuer for an indefinite period of time), any Hedging Agreement (for example its possible early termination in various circumstances which would result in the cancellation of the Instruments) and the related credit exposure to the Hedging Counterparty, credit exposure to the Collateral Obligor (as this will affect the value of the Collateral held as security for the Instruments), early cancellation of the Instruments which may lead to a loss of investment, fluctuations and decreases in the market value of the Instruments and the market value of the Collateral which will also affect the value of the Instruments and the amounts paid on any cancellation of the Instruments, tax risks (for example that if any withholding or deduction for taxes is required, the Issuer may redeem all the Instruments), that no secondary market may exist for the Instruments meaning that investors may not be able to realise their investment prior to maturity and business relationships between the parties to the Instruments, rating will not necessarily be the same as any rating assigned to any Instruments already issued, conflicts of interest which may adversely affect the value of the Instruments and that although Instruments will have the benefit of security interests over all the Series Assets of the Compartment, the Securitisation Act 2004 provides that the Series Assets for the Series of Instruments are available to meet only the claims of the Series Parties for the Series. If the Series Assets are not sufficient to discharge all payments obligations of the Issuer in accordance with the applicable priority of payments, Instrumentholders may lose their entire investment.
